Subject: Application to include 3 x Philips Tango Flood Lights onto AEMO Load Table

Dear David,

Signify Australia Ltd has been invited to seek inclusion of the following LED Flood Lights in the NEM load table by Energy Queensland, per the attached letter.

The following fittings are being put forward for inclusion:

Description	Average Tested
	Wattage
BVP431 70W	69.62W
BVP431 100W	98.53W
BVP432 200W	191.93W

The following documents have been included in this submission:

- Supporting document from Energy Queensland requesting inclusion onto AEMO load table
- LCP BVP431 70W: 20211109022_70W
- LCP BVP431 100W: 20211109024_100W
- LCP BVP432 200W: 20211109025_200W
- Datasheet for Tango Floodlights

The luminaires were tested using a NEMA base shorting cap, and the PE Cell load was not included in the Test Reports.

(s) ignify

Each luminaire will have marking complying with TS 1158.6. This will be achieved by placing a label with indelible ink on an area of the luminaire that is visible when the luminaire is installed.

I appreciate your assistance with this application for inclusion onto the AEMO Load table.

Kind Regards,

D. Lipiz
